

Department of Electrical and Computer
Engineering
Instructor : Hassan Tfaily

Lab # : “*title*”

Section # -----

Instructor: Hassan Tfaily

Student ID:

Student Name:

General Guidelines

- You will be divided into teams of two students , so everyone must choose their partners in the first Lab session, and you'll get your PBMCUSLK board.
- You should be familiar with the background theory .
- Follow the instructions in your Lab manuals to program the required tasks , then download it to your board to test the results.

To prepare your report:

1. Answer very clearly all the questions of the Pre_Lab in a word document .
2. Explain the instructions of the solved tasks in details by writing comments after each instruction.
3. Create a folder that contains the word document and the folder where you've created the CodeWarrior project to send it to Blackboard.

Cover Page

Each lab report should have the same Cover Page shown above .

Table of Contents

Each lab report should contain a **table of contents** that shows each section's titles and page numbers.

Table of Figures (If Applicable)

Please provide a table of figures structured identically to the table of contents if your report contains any figures.

Table of Tables (If Applicable)

Provide a table of tables structured identically to the table of contents if your report contains any tables.

Introduction & Conclusion

Your lab report should contain an introduction and a conclusion .

The introduction section must describe the purpose of the lab and the modules or peripherals that you have worked on during this Lab session.

Code Explanation

Explain your code IN DETAILS by writing comments clearly and correctly.

References

If you use any external information in your lab report, please make sure to cite the sources used in this section. Include links to the web pages visited where applicable.

Correction Methods and Approach

In the coding parts, you will be assessed if the code is working, AND explained clearly.

Cheating will not be tolerated, any Lab report copied from previous years' reports will have a grade of '0', and LAU code will be strictly enforced. Researching a topic or a code is encouraged. You will be responsible for finding proper sources and correct information and do not assume anything is correct because it is online.

Lab reports should be submitted by the deadline set on Blackboard. You will be given enough time to submit so do not leave it till the last minute and be surprised by Internet or Power shortages. Late submittals are not allowed.
